

Using Epsom Salts for your dog's feet.

For use as advised by your veterinarian

- 1) Get the dog treats ready!
- 2) Get a small plastic container deep enough to put your dog's foot in - an ice cream container is often ideal.
- 3) If the foot is really dirty then shampoo or rinse it first.

- 4) Add warm water and epsom salts - roughly 1 cup (450g) of epsom salts to 1 pint (just over 500mls) of warm water.

- 5) Gently place your dog's paw in the water, making sure it is fully covered
- 6) Give treats!

- 7) Wait 5 minutes with your dog's paw in the solution
- 8) Give treats!

- 9) Remove your dog's paw from the water and gently examine the underside. If you see any blackheads or trapped hairs, gently squeeze or pull out with tweezers

- 10) Pat foot dry.
- 11) Give treats!
- 12) Do on other affected feet.
- 13) Repeat every ___ days
- 14) Recheck with your veterinarian in ___ days
